

Water Garden:

A semi-enclosed quiet space surrounded by plants with diverse textures. The water feature is structured to include a gentle stream, trickling over a number of bamboo steps onto a 'Rocking Fountain' and into a small, shallow pond.

The area is assembled using painted recycled tires serving as :

- 1. planters
- 2. seats
- 3. pond
- 4. hanging baskets
- 5. brackets for water feature.
